Description

perl-Perl4-CoreLibs - Libraries historically supplied with Perl 4

Property	Value
Operating system	Linux
Distribution	CentOS 8
Repository	EPEL x86_64 Official
Package filename	perl-Perl4-CoreLibs-0.004-9.el8.noarch.rpm
Package name	perl-Perl4-CoreLibs
Package version	0.004
Package release	9.el8
Package architecture	noarch
Package type	rpm
Homepage	https://metacpan.org/release/Perl4-CoreLibs
License	GPL+ or Artistic
Maintainer	-
Download size	49.41 KB
Installed size	104.92 KB

This is a collection of .pl files that have historically been bundled with the Perl core and were removed from perl 5.16. These files should not be used by new code. Functionally, most have been directly superseded by modules in the Perl 5 style. This collection exists to support old Perl programs that predates satisfactory replacements.

Alternatives

Package	Version	Arch	Repository
perl-Perl4-CoreLibs-0.004-9.el8.noarch.rpm	0.004	noarch	EPEL Official
perl-Perl4-CoreLibs	All	All	All

Requires

Download

Type	URL
Mirror	download-ib01.fedoraproject.org
Binary Package	https://download-ib01.fedoraproject.org/pub/epel/8/Everything/x86_64/Packages/p/perl-Perl4-CoreLibs-0.004-9.el8.noarch.rpm
Source Package	https://download-ib01.fedoraproject.org/pub/epel/8/Everything/SRPMS/Packages/p/perl-Perl4-CoreLibs-0.004-9.el8.src.rpm

Install Howto

1. Download latest epel-release rpm from

http://download-ib01.fedoraproject.org/pub/epel/8/Everything/x86_64/

2. Install epel-release rpm:

rpm -Uvh epel-release*rpm

3. Install perl-Perl4-CoreLibs rpm package:

dnf install perl-Perl4-CoreLibs
